

Mobile Fleet, Employee, Dispatch & Asset Management

Fleet Freedom provides businesses with relevant, simple and easy to use GPS location based services for your needs today and what they will be in the near future. Fleet Freedom provides a fully integrated solution combining Fleet and Mobile Resource Management into a single service. This helps businesses better manage their mobile fleet, mobile employees, dispatch and high value assets.

Using a Magellan RoadMate, Android or iOS device, businesses can now manage and assist their field employees in a whole new way by:

Hours of Service & Punch Clock ▶ Employees can automate hours of service. Dispatchers and Fleet Managers can see who is on shift, on break and off shift.

Driver Identification ▶ Fleet Freedom will dynamically show which employee is driving which vehicle each day.

Dispatch ▶ After punching in on their device, the employee will automatically have all their tasks loaded for the day. When they choose a task, the GPS will navigate to the destination.

Trucking Routes ▶ Magellan RoadMate Commercial devices, used with Fleet Freedom, will customize the route based on the vehicle's height, width, length and weight.

Application ▶ Fleet Freedom shows vehicle location, employee status, tasks assigned and completed. Customized historical reports can show employee productivity, vehicle utilization, fuel tax data and much more.
